THE COLUMBIA DAILY SPECTATOR

***Does the threat of CANCER
or AIDS frighten you?***

- Do you worry a lot about your health?
- Do you sometimes fear that you may have a serious illness that doctors have not been able to identify?

If you said yes to any of these questions you may be suffering from a genuine illness known as "*Heightened Illness Concern*". Recent research indicates that medications are now available that can help you feel physically better and worry less. *Free* treatment in our research program is available.

All eligible study participants will receive *free* psychiatric evaluations, physical exams, electrocardiograms, and laboratory tests.
