

part 1

Pro-gay
Pro-AIDS

intros - age, school, field, political background, peer counseling, AIDS work

reaction to AIDS 101

what the project on campus is -

not actually work with PWA's

- but - ① stopping transmission (safe sex)
- ② stopping discrimination by teaching no cos on

importance of peerby college age -

before infected - sexual lives

do it with role models & consensus

but

problems w/ adult pop. impulsiveness

first date: sexual discomfort
difficult imagining mortality

dimensions of problem -

- difficult info (medical/sci) they can know more than docs
- difficult psychology (sex, date uncertainty)
- exposure social context (dis, peer govt)

GHA - Nelson Muni - course.

- type Jodi's list.

- bring pamphlets

- AIDS 101 outline

- 6 mo. plan outline.

- information packets.

- xerox list of testing sites

& groups

- training packets.

- bring ads in.

XXXX

Session 3: 6 month plan =

Developing Information

① Gather information that's already printed to learn and also to put together a packet you can give out.

GMHC and AIDS Project CA. can provide some free materials.

② Read "Confronting AIDS" - Nat'l Academy of Sci's - to begin educating

OB What need's to be in package? " ^{Medical} ^{GMHC} ^{about AIDS} ^{and} ^{pamphlet} ^{GM}

- gen'l information book: casual contact, risk-reduction, testing. ^{NGMA}

- anonymous testing site list in their area. ^(GMHC anxiety leaflet)

- mass book

- hep. B: our leaflet, but could do better

- list of other contacts for government, descr'n, other nearby AIDS orgs w/ more services.

②^B - Subscribe to MMWR ~ \$24., read NYT critically,

get a pre-med to read articles on transmission, not

treatment, not varieties of testing in: NEJM, JAMA, Lancet,

Annals of Internal Medicine, J. Infectious Disease, Sci. Am.,

Science, popular press - Village Voice - Native not to be trusted.

Target audience is "worried well" - eyes on the prize -

casual contact, transmission, prevention.

Learn to talk simply & clearly - science is for credibility

not for information process.

Go to events, lectures, workshops, conferences

AIDS doc's or experts - if affil'd w/ med school ask

if there's an expert.

I had @ 7pm Saturday.

③ Have to practice delivery - don't assume passive

observing works - USG not claiming

need money
Health Services
Dean's office
for xeroxing & phones

down

Developing
DS 101

GHA Nelson:

Developing outreach:

- ① get hired guns to start, you handle room, publicity, MC'g, = forum or discussion
- ② commonly AIDS org's often do safe-sex workshops. you just sponsor them.
also not hard to give your own, just advertise it well (w/ breakfast!) and let people talk themselves provide a stimulus for discussion - movie? excerpts
- ③ when you're ready - give AIDS 101 yourself - try for closeted people - down rpt, classes, disc'n groups, health groups - be an AIDS speaker bureau.
- ④ advertise services
- ⑤ recruit more ardely

→ long-term

⑥ develop relationships w/ local media -

Developing local resources:

① recruit a core group (min. 2 people).

- need time, commitment, this is major issue for them
- if at Univ., grad students can be helpful.
- overlapping academic work: ^{or skills: speaking,} pre-med, sociology, nursing, social wk, public health, law, sociology -
- recruit faculty advisor: HS, MHD, admin, staff. (n.b. - is good for advisor too!). (health educator).

② {
- get access to a computer if you can plus a good gay CS person to ~~the~~ sustain.
- xeroxing/printing
- long-distance telephones.

③ liaison w/ gay community: (or other affected groups).
on-campus - undergrad, prof' schools, nearby univ's
off campus - AIDS groups, DOH, DOE, gay org's,

④ liaison w/ health service

- care: is there good care for worried well
- confidentiality:
- sensitivity/homophobia
- hep B and other STD's
- support for AIDS program
- testing: do they do it? counseling? conf'y?
do they encourage all to do it?

~~④~~ - do they talk about safe sex info? is it available.

⑤ liaison w/ admin:

- ~~policy~~ talk to deans, residence counselors, advisors
- demand a presentation in admin

BHA - Nelson :

reactions to AIDS 101

pro-sex pro-gay

why do it on campus?

- ① introductions -
- where they're from
 - school
 - academic field
 - political background.
 - peer counseling background
 - AIDS work

avoid infection is best hope - college age is the time to save lives.

dimensions of problem -

- difficult information (medical/sci)
- difficult psychology (sex, death, uncertainty)
- explosive social context (discrim, segregation)
- ~~peer~~ desiring of people of a certain age

role models
concerns

② 6-month plan.

- intro
- learn material
 - network (local AIDS gp, docs)
 - get known (as source to answer questions)
 - ~~plan~~ a forum with outside speakers
 - put together packet of material
 - run a safe sex workshop (if local AIDS goes after one) (or by yourself if you have resources)
 - give AIDS 101
 - working w/ health service incl. counseling services

③ advanced topics

- counseling
- ~~working to health service~~
- ~~liaison to administration~~
- harassment and discrimination

④

work ed. well vs. AIDS, PWARCI
